REACH DECLARATION

January 23, 2024

REACH is a European Community Regulation on chemicals and their safe use (EC 1907/2006). It deals with the Registration, Evaluation, Authorization and Restriction of Chemical substances. The new law was entered into force on June 1, 2007 and will be phased in with new additions. The aim of REACH is to further improve the protection of human health and the environment through the better and earlier identification of certain chemical substances. It is legislation from the European Union, and applies to all suppliers (inside and outside Europe) who want to sell, import or manufacture chemicals and/or products containing certain chemicals into the European Union. Precision Digital Corporation supports the objective of REACH to further improve the European Union's regulation on chemicals, including the aim to advance public health and safety and to protect the environment.

Precision Digital Corporation is a manufacturer and distributor of electronic products, thus, in the sense of REACH, we are termed a "Downstream User". The products we supply are solely non-chemical products (goods). Moreover and under normal and reasonably foreseeable circumstances of application, the goods we supply shall not release any substance. We have requested our component or finished products suppliers to provide us information on the relevant chemicals in their supplied products. This enables us to provide our customers with information about designated Substances of Very High Concern (SVHC), as required by article 33 of REACH (if those are present in a concentration of more than 0.1% of the weight of a product). These substances are named on SVHC candidate list 240 as of January 23, 2024. Precision Digital Corporation is committed to working with our suppliers and customers to ensure continued notification of compliance.

Precision Digital Corporation declares that to the best of our knowledge that the products we provide are compliant to the restrictions on substances listed in Annex XVII of REACH. As a Downstream User, there is no obligation for our company to register/pre-register anything. However, we will ensure our upstream suppliers will pre-register/register for which REACH registration requirements are applicable except where considered already registered under the regulation.

Sincerely,

A handwritten signature in blue ink that reads "Jeffrey Peters".

Jeffrey Peters
